## Technical Skills:

- **Languages:** JavaScript, Java, Python, TypeScript
- **IT Constructs:** Data Structures and Algorithms, OOPS, OS, DBMS
- **Web Development:** Node.js, REST APIs, Mongoose, DOM manipulation, CRUD Operations, User Authentication and Authorisation, Git & Version Control, Redux, CSS, SASS
- **WebDev Tools:** VSCode, Postman, Chrome DevTools, GitHub, GitHub Action Figma, AWS, Docker, Kubernetes, Redis, Vercel, Netlify
- **Frameworks:** Next.js, React, Node, Express, Mongoose, Prisma ORM, Django, Django REST Framework, Tailwind, Bootstrap, MERN
- **Database:** SQL, MySQL, MongoDB

## Work Experience:

**iEdito (Dec 2023 - May 2024) :** ([iedito.com](https://iedito.com))

- Spearheaded the adoption of Next.js and integration of the Sharp library for image processing, enabling SSR to boost search engine visibility; resulted in a 30% increase in organic traffic and a 20% decrease in bounce rate.
- Enabling SSR to improve SEO visibility; decreased page load times by 40% and boosted search engine ranking by 25 positions.
- Utilized Tailwind CSS for sleek UI design and Headless UI components for improved user experience and SEO friendliness.
- Proficient in implementing image cropping functionality using React-Image-Crop.
- Committed to creating mobile-responsive designs for optimal accessibility and search engine ranking.
- Key expertise includes Next.js, image processing, Tailwind CSS, React-Image-Crop, SSR, and SEO optimization & MERN.

**Tractor hub (Jun 2023 - Nov2023) :** ([tractorhub.online](https://tractorhub.online)) Dynamic Full Stack Developer proficient in developing high-performance web applications. Successfully built TractorHub.online using **Next.js React with SSR (Server-Side Rendering)** for optimized performance. Implemented **Redis** for efficient caching and **SWR** for seamless data fetching and mutation, enhancing user experience. Utilized **NeonDB Postgres** Serverless for robust data storage and management. Leveraged **Tailwind CSS**, **Headless UI**, and **Shadcn** for modern UI design, Deployed Next.js app routing and Edge Functions for efficient API deployment on Vercel.

- [www.cloudkitch.co.in](https://www.cloudkitch.co.in) (dec 22 - mar 23): Backend Developer at CloudKitch.co.in, proficient in **React Node.js** and **Express**, specializing in **REST API** development. Responsible for designing and implementing route controllers and aggregation functions. Developed middleware for user authentication using **JWT** tokens for secure access. Implemented efficient password hashing techniques using **bcrypt** for enhanced security measures, Used **Redux** to manage states.

## Personal Projects:

**IMAGINIFY** | [Link](#) ( Next.js, mongoose, Tailwind CSS, Stripe, Zod, clerk, Cloudinary)

- I led the development of a Software-as-a-Service (SaaS) application that integrates AI functionalities and a robust payment and credit system. Leveraging Next.js 14, Clerk, MongoDB, Cloudinary AI, and Stripe, I ensured seamless integration and optimal functionality for users.

**ANIME-VAULT** | [Link](#) (Next 14, MongoDB )

- Develop a Next.js 14 server-side application featuring Server Actions, Infinite Scroll, and Framer Motion animations.

**NEXTJS-BLOG** | [Link](#) (Next.js MongoDB NextAuth, Bcryptjs)

- Developed a dynamic blog application utilizing Next.js, MongoDB, and NextAuth, seamlessly integrating OAuth authentication for GitHub, Google, and email login. Deployed the Node.js application with Express.js to AWS Lambda, utilizing a serverless database powered by Neon Postgres for enhanced scalability and efficiency.

## Education:

- MAC (2021 - 2023) A.K.T.U LUCKNOW
- B.C.A (2017 - 2020) UNITED INSTITUTE OF MANAGEMENT PRAYAGRAJ
